EXPERIENCE

Freelance Full-Stack Developer   Nov 2023 - Present

- Developed and deployed a comprehensive Automotive Service Management System using .NET Core MVC, handling customer data, vehicle services, and financial transactions with secure authentication.
- Implemented clean architecture using SOLID principles, repository pattern, and asynchronous programming with comprehensive error handling.
- Collaborated closely with business owners to tailor design elements and user flow, resulting in intuitive navigation and a polished brand presence.
- Delivered and maintained production front-end websites for Auckland-based businesses.

IT Hardware Processing Technician   August 2023- Present

- Diagnosed and repaired hardware and software issues for laptops, desktops, servers, and other devices, ensuring optimal performance.
- Executed secure data wiping processes to prevent data breaches, adhering to strict compliance and confidentiality standards.
- Communicated with managers to ensure accurate implementation of technical processes and guidelines.

PROJECTS

Automotive Business Management System | Full-Stack

- Automated invoicing and quotation processes, reducing manual work and increasing creation speed by over 90%.
- Integrated an interactive financial dashboard displaying total invoices, payments, and balances for real-time insights, enhancing decision-making efficiency.
- A full-stack system using .NET Core (MVC), Entity Framework, HTML, CSS, JavaScript, and Bootstrap to streamline customer and car management for an Auckland-based client.

Responsive Business Websites

- Designed and launched performance-optimized, responsive websites for real businesses, including a Mobile Mechanic (Mobile Mekaniko) and an IT services business (IT-Hardworx).
- Delivered excellent user experience with mobile-friendly layouts using HTML, CSS and JS.

E-Commerce Website | Full-Stack

- Built a responsive e-commerce store using .NET Core MVC, Entity Framework, and JavaScript for dynamic filtering and cart management
- Implemented secure user authentication with role-based dashboard for admin operations using Identity Framework and Bootstrap
